UPS International Shipping

Getting your shipments where they're needed — on time and intact

UPS doesn't believe in one-size-fits-all solutions. Businesses in Singapore, like most businesses around the world, have varying shipping needs. Hence, UPS has designed four basic international delivery services to meet those needs.

These services let you decide what time your shipment arrives at the destination. By choosing the right service, you can control your shipping costs!

Delivered first thing in the morning.

Let's say you have an extremely urgent document that needs to be signed by your client in San Francisco first thing in the morning. UPS Worldwide Express PlusSM guarantees that your document is delivered to your client by 8:00 am. This service level covers major cities in the US, Canada (8:30 am delivery), Asia and Europe (9:00 am delivery).

Delivered by noon.

If your customer, who manages a factory in China, needs an urgent shipment of spare parts by 12 noon, UPS Worldwide ExpressSM is the right choice. This service level offers a 10:30 am or 12 noon delivery to major cities in Asia, Canada, Europe, most parts of the US and selected areas in the Americas.

Delivered by the end of the day.

If your shipment is not time sensitive, you can opt for an economical alternative. UPS Worldwide Express SaverSM guarantees delivery by end of day to more than 200 countries and territories worldwide.

Not-so-urgent shipments.

If your buyer in Germany wants a product sample delivered in as little as three business days, UPS Worldwide ExpeditedSM is your best bet for this not-so-urgent shipment. This service level covers major business centres in Asia, Europe, North America and South America.

What's more, a host of innovative options in UPS Internet Shipping make tailor-fit shipments easier than ever. You can create, review, track and void your shipments all with a click of a button. Once you have entrusted your package to us, you and your customer can easily track its progress by keying in the tracking number at www.UPS.com. It will provide every detail including who signed for the package at the other end.

If the four basic UPS services above do not meet your international delivery, logistical, supply chain or warehousing needs, talk to us! We have many other products and customisable solutions that can address your needs at the right cost.
