MARKET FOCUS

Italy's strategic placement makes it easy to reach the 396 million consumers of the other Union member countries and the 240 million of North Africa and the Middle East.

[READ MORE](#)

Q&A

Entering the Italian market through a joint venture with a company already present there will allow the foreign company to avoid wasting time with Italy's complicated bureaucracy.

UPS PRODUCTS & SERVICES

UPS Trade Direct: One carrier, One bill, One simple solution

Looking for an effective way of managing cost and increasing speed to market? UPS Trade DirectSM can help you gain a distinctive advantage in today's international trade environment through an unsurpassed level of supply chain efficiency.

Unlike traditional freight forwarding, which moves shipments to a distribution centre or warehouse, Trade Direct is a factory-direct, single-source solution that enables faster movement of international shipments to multiple retail locations or end customers.

Simply put, Trade Direct consolidates your freight and individual packages for customs clearance, transports them (via ground, ocean or air) and then deconsolidates the shipment for final delivery via the UPS package delivery network or Less-than-Truckload.

FULL VISIBILITY: End-to-end tracking provided throughout the supply chain.

Freight and individual packages are picked up and consolidated.

Consolidated shipment crosses the border, requiring only one customs clearance.

Freight moves forward via LTL. Packages are inserted into the UPS package delivery network.

Package and LTL shipments are delivered direct to multiple retail stores and end customers.

Because UPS serves more than 200 countries and territories worldwide, we stay current with government regulations, understand customs and security requirements, and speak the language. With expertise earned as both a logistics leader and the world's largest package delivery company, UPS is uniquely capable to be your reliable, multi-modal, end-to-end shipping source.
